

Connected® Backup for PC

Safe. Available. Always.

PROTECT DISTRIBUTED DATA AND ENSURE BUSINESS CONTINUITY

Has protecting data outside the network become one frantic firefight after another? Is your business at risk because PCs and laptops are not backed up often enough? Do painful recoveries often result in lost data while eating up valuable IT time that should be spent on strategic initiatives that can advance your business?

Connected Backup for PC from Iron Mountain Digital, the original, undisputed number one PC backup solution, automatically backs up desktops and laptops as users work and enables the instant retrieval of lost or damaged files directly by the users. By giving IT centralized control of PC data, this simple — yet powerful— solution keeps your data safe and always available. It provides:

AUTOMATIC BACKUP. Rapid, automatic and non-intrusive backup of PC data, without user action or IT intervention.

RAPID RECOVERY. Allows users to easily recover their own data through a secure web portal or perform a system rollback, without IT intervention.

DATA REDUCTION/DEDUPLICATION. Sophisticated SendOnce™, DeltaBlock™ and Connected EmailOptimizer™ technologies reduce storage needs by up to 85 percent.

UNMATCHED SCALABILITY. Manage just a few to tens of thousands of PCs with one centralized tool.

SECURE STORAGE. Advanced encryption and high-security, off-site vaulting protect data at all times.

With over 2.5 million PCs and laptops and more than 12 billion backed up files under protection for thousands of companies and millions of people around the world, Iron Mountain Digital is the world's leading provider of data backup/recovery services. Find out how we can help you spend less time fighting fires and more time on tasks that make a difference to the bottom line.
